India witnesses significant decline in Maternal Mortality

Ratio (MMR)/

As per a report released by the Registrar General of India on 30 November India has witnessed a significant decline in the Maternal Mortality Ratio (MMR) from 130 in 2014-16 to 97 in 2018-20 on per lakh live births.

Maternal death is defined as the death of a woman while pregnant or within 42 days of termination of pregnancy, from any cause related to or aggravated by the pregnancy or its management.

The MMR is defined as the number of maternal deaths during a given time period per one lakh live births.

Three highest MMR State

Assam has the highest maternal mortality rate (MMR) at 195, followed by Madhya

Pradesh at 173 and Uttar Pradesh at 167 (per lakh live births).

States with lowest MMR

Kerala has the lowest MMR of 19 per lakh live births, followed by Maharashtra 33 and Telangana 43.

India has thus met the National Health Policy target of an MMR of less than 100 per lakh live births and is on course to achieve the Sustainable Development Goal of an MMR of less than 70 per lakh live births by 2030.
